Looking for a facility released from quarantine?

In late August 2008, MDA issued a statewide quarantine to prevent the potential movement of CWD exposed cervids and cervid products. As the epidemiological investigation rules out certain facilities, quarantines on these facilities will be released.

Privately owned cervid (POC) facilities in Michigan that meet the criteria for release will be issued a quarantine release document. Owners of non-quarantined POC facilities wishing to acquire or deliver cervids in accordance with their POC license should verify that the delivering or receiving facility is no longer under the constraints of quarantine by requesting a copy of this quarantine release document.
